- WHEREAS, we believe that our students have the right to an education worthy of their aspirations, struggles and needs, and have dedicated our professional lives to meeting those needs, and refuse to compromise on the quality of their education; and
- WHEREAS, we oppose the process by which we and other faculty at CUNY have been pressed, against our professional judgment, to propose and vote for courses that conform to Pathways guidelines; and
- WHEREAS, we support and respect the right of CUNY faculty to vote their for or against any curricular matter, freely and without fear of adverse consequences; and
- WHEREAS, we reject the practice by which departments are invited "to exercise [their] professional judgment," (Chancellor Goldstein's letter, September 19, 2012) only to find that such judgment may not be respected in the final determination of curriculum and implementation of change,
- BE IT RESOLVED THAT we reject the claim that Pathways must be implemented immediately and endorse the call for a moratorium on further implementation of Pathways in order to enable our academic community to initiate a more respectful and democratic process of reflection on how to facilitate student transfer at CUNY—a goal to which Queensborough faculty remain strongly committed.
-
